

PRESS RELEASE

HoloRuminant Stakeholder Event on Cattle Research

The EU Horizon 2020 project **HoloRuminant** is excited to announce its upcoming Stakeholder Event hosted by IRTA, focusing on the latest research in calf microbiota and performance. The event will take place on **Thursday, November 21st, from 12:30 - 16:00, at Torre Marimon, Caldes de Montbui, Spain**. This hybrid event will be held in Spanish, with live interpretation between English and Spanish for all attendees.

The event will focus on the current research in **ruminant microbiota and performance**, presented by our researchers from the HoloRuminant project and guests. As part of the program, attendees will have the opportunity to tour IRTA's experimental farm and the **young ruminants**, providing an insight into how research is carried out. This event serves as a great networking opportunity for **policymakers, farmers, professionals, researchers**, and other key stakeholders to come together, exchange ideas, and build networks around ruminant health and productivity.

Event Highlights:

- Expert presentations on ruminant microbiota, health, and productivity.
- Exclusive tour of IRTA's experimental farm with a focus on research involving young ruminants.
- Networking opportunities with top professionals and experts in the field.

Event Information:

- Date: Thursday, November 21st, 2024
- Time: 12:30 PM - 4:00 PM (CET)
- Location: **IRTA**, Torre Marimon, Caldes de Montbui, Spain
- Format: Hybrid (In-person and online attendance)
- Language: Spanish (with English-Spanish interpretation)

Please [register here](#) to secure your spot.

Coordinator: Diego Morgavi (INRAE)
